

Economic growth and development

The economy is the first basic pillar of a nation. Looking towards the developed nations, Pakistan should concentrate on building all kinds of industry to strengthen its economy. This will increase not only the cash in hand in our nation but it will also provide many new employment opportunities. We will prepare the base in Pakistan for joint ventures from our friendly countries.

- Education in engineering and engineering facilities should be enhanced. So that we may get skilled people to move our industry into the developed future world.
- The education universities should be linked directly with our local industry, so the development of industry may be boosted from fresh ideas of our intelligent youth.
- The natural resources of Pakistan should be explored and managed to enhance the economy of Pakistan.
- Tax rebates should be given to the manufacturing industry.
- Pakistan has an enormous potential for tourism which should have been explored properly. The tourism industry should have been promoted within the country. Our foreign offices should also have taken the necessary measures to enhance tourism in Pakistan.

Ensure Pakistan's National Security

Security of Pakistan and its borders is a prime concern issue that can never be forgotten and should be kept ahead in our priorities. For border security, the Pakistan army will be strengthened. We like to put all our efforts and the economy behind this goal. The image of the Pakistan army should be enhanced among the citizens of Pakistan.

To enhance the internal security of the country police force needs improvement. Police forces should have been provided better equipment and facilities so that they can perform their duties in the best interest of citizens of Pakistan.

Education Policy

Education is the basic right of people it should be provided either free or at a very low cost. We will do our efforts to make education economical for citizens of Pakistan. We will pay more focus on technical education and on education which enhances the basic and professional skills in youth. So in the future, Pakistan may have all kinds of resourceful people in every field of life.

- Science and technology need focus and budget from our economy.
- As our nation needs new solutions and remedies for our political and social problems, we will not leave humanity & social education in a corner. We have to bring these education fields in light and should invest in them too.
- For fresh graduates, internships would be provided immediately so they can learn practical work in their particular field and may not hesitate to participate in the development of the nation.
- Social laws and social life skills will be included in the curriculum at school level.
- Imam and khateeb of masjid must be properly educated and certified by a well known madrasa.
- Free education should be provided to transgender and the job quota in the government will be provided to solve the problem of transgender which is poisoning the society.

Foreign policy

Pakistan should be a prominent country in the upcoming future world. For this, we need strong relations with our neighbors and other countries. We will be in favor of taking strong measures to strengthen our relations with our neighbors. We would prefer to resolve issues with them with peaceful negotiations. We strongly believe in friendship with our neighbors and other countries.

We will try to open our borders to our friends so we may go towards the aim of the global village. We are in favor of open trade systems and policies with our friends.

Health policy (Health for all)

To improve the health condition of our nation we will invest in education, research, and development in the field of health sciences. To improve basic health facilities for the citizens of Pakistan we will improve the conditions of existing hospitals. To increase the base of health facilities a network of clinics and dispensaries will be spread in the rural areas.

- For the betterment of women's health, we will spread the network of lady health visitors
- To improve the field of health sciences, we will create new posts and people will be employed in it based on merit.
- New medical colleges and education hospitals will be made to increase our medical force with the utmost skills.
- Health insurance programs would be formed with the help of world health organizations.
- Almost every year we get floods, famine, epidemics and all the resources are used in providing relief. We will do reforms in NDMA to prevent the causes of above mentioned disasters.
- Private hospitals should also be monitored and certified according to facilities provided in these hospitals.

Justice

Justice is important to prevail in every field of life, so every citizen of Pakistan may be able to work at a piece of mind and may not have any fear to lose his honor, dignity, property, or life.

- Justice must be speedy and in the reach of every citizen of Pakistan.
- Social laws should be taught to people by using media.
- All Muslims and non-Muslims should be provided their rights according to their books.

- To finish the small disputes among the citizens of Pakistan, the judiciary base should be expanded and brought down to lower constituencies like at the chairman level.
- The government should ensure constitutional rights for minorities.

Media

Media should be kept free within the brackets of national interest of Pakistan and the people of Pakistan.

Agriculture

Pakistan is having very fertile land and it's an agricultural country. We would have to make agricultural reforms to facilitate the farmer of Pakistan. The agricultural field should be without any tax. Pakistan should export wheat cotton and rice again in the world markets. New crops should be located for growth and export to add revenue to the national income of Pakistan.

Basic Human Necessities
